

# Scarcliffe Primary School

## Supporting Pupils with Medical Conditions Policy

Review Date	Changes Required	Name & Position

## **Policy Statement**

It is the policy of Scarcliffe Primary School that we will administer medication in situations where medicines are required. This applies to *both prescription and non-prescription medicines* where taking these is essential during school time to allow a pupil to attend school.

It should however, be noted that where a pupil is not well enough to attend school they should not do so and not be sent in with medicine.

The school understand that administering medicines is a purely voluntary activity with the exception of staff where this is written into their job description and will not force, pressure or expect staff to undertake this activity.

The school will only accept medicines in their original container accompanied by a fully completed parental consent form. It is a parent/carers responsibly to supply the medicines in date and to collect and dispose of any unused medicines.

## **Aims**

This policy aims to ensure that:

- Pupils, staff and parents understand how our school will support pupils with medical conditions
- Pupils with medical conditions are properly supported to allow them to access the same education as other pupils, including school trips and sporting activities

The governing board will implement this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of pupils' conditions, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions
- Providing supply teachers with appropriate information about the policy and relevant pupils
- Developing and monitoring individual healthcare plans (IHPs)

The named person with responsibility for implementing this policy is Ian Marsh (Head Teacher).

## **Legislation and statutory responsibilities**

This policy meets the requirements under Section 100 of the Children and Families Act 2014, which places a duty on governing boards to make arrangements for supporting pupils at their school with medical conditions.

It is also based on the Department for Education (DfE)'s statutory guidance on supporting pupils with medical conditions at school.

## **Roles and Responsibilities**

### **Governing Body**

1. To review this policy periodically to ensure it is still relevant and up to date
2. To support the Headteacher and staff in delivering this policy and to make any necessary resources available to enable them to do so.
3. To ensure that the key elements relating to parents/carers responsibilities are published and communicated to parents/carers in a suitable manner e.g. schools prospectus, schools website, newsletters.
4. To ensure suitable facilities for the administration of medicines are provided

### **Headteacher**

1. Make sure all staff are aware of this policy and understand their role in its implementation
2. Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
3. Ensure that all staff who need to know are aware of a child's condition by keeping the Vulnerable Pupil Tracker (VPT) up-to-date.
4. Take overall responsibility for the development of IHPs
5. Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way
6. Contact the school nursing service in the case of any pupil who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse
7. Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date

### **Staff Volunteering to Administer Medication**

1. To ensure they are competent (and where necessary trained) and confident to undertake the administration of the medicine
2. To fully check before administering any medication that it is the correct medication for the correct pupil and is being administered in line with the instructions on the label and the parental consent form.
3. To record all medicines administered on the correct recording form.
4. To immediately bring to the attention of the Headteacher any mistakes made in the administration of any medicine.
5. To ensure any training undertaken is refreshed as necessary
6. To ensure confidence (knowledge of) the immediate line management structure.

Supporting pupils with medical conditions during school hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

### Parents:

1. Provide the school with sufficient and up-to-date information about their child's medical needs
2. Be involved in the development and review of their child's IHP and may be involved in its drafting
3. Carry out any action they have agreed to as part of the implementation of the IHP, e.g. provide medicines and equipment, and ensure they or another nominated adult are contactable at all times
4. Take responsibility for ensuring that the correct medicines are in school, are clearly labelled and are in date.

### Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

### School nurses and other healthcare professionals

Our school nursing service will notify the school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts school, wherever possible. They may also support staff to implement a child's IHP.

Healthcare professionals, such as GPs and paediatricians, will liaise with the school's nurses and notify them of any pupils identified as having a medical condition. They may also provide advice on developing IHPs.

### **Equal opportunities**

Our school is clear about the need to actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

## **Arrangements for Administering Medication at Scarcliffe Primary School**

### **Receipt of Medication**

No medicines (prescribed or non-prescription) will be allowed into school unless accompanied by a fully completed consent form completed by a parent or guardian a copy of which is located on the school website and in Appendix 1.

The form and the medicines should be completed online or brought to the school office and handed over to Ms Rich (or a different staff member in her absence).

Medicines will only be accepted in their original container with the dispensing label clearly stating as a minimum the name of the young person, the name of the dispensing pharmacy, date of dispensing, name of medicine, amount of medicine dispensed and strength, the dose and how often to take it and if necessary any cautions or warning messages. Non-prescription medicines should be in their original bottle/containers clearly labelled with the young person's name.

Ideally only enough medicines for the day are to be supplied as this will avoid confusion or the chance of too much medicine being given. However, where a pupil is on a long term course of medication the school will by arrangement with parent/guardian agree to store sufficient medicine to avoid unnecessary toing and froing of medicines on the understanding that these will be in date for the duration agreed supplied as per the previous statement and parent/guardian accept they are responsible for collecting and disposing of any excess medicines or medicines which are out of date.

Staff administering the medication will ensure that they check the information on the prescription label matches the information on the parental consent form. As prescription labels may have vague directions for administration such as "as directed" or "as before", unless there are clear directions on the parental consent form the medicine will be rejected and won't be stored or administered in the school until there are clear directions.

Any medicines not provided in the original containers, appropriately labelled and with a fully completed parental consent form will not be administered. In the event that the school decided not to administer the medicine the parent/carer will be informed immediately so they can make alternative arrangements for the medicine to be administered.

Staff and parents/guardian should check and agree the quantity of medicine provided and this should be recorded on the Medicines Administration Record (MAR) sheet Appendix 2 and signed by the staff member.

The school will ensure parents are made aware of the above requirements at the start of each year and are reminded of them periodically via the school website, Class Dojo and newsletters.

The school on receipt of the medication and completed parental consent form will ensure a suitable medication administration record (MAR) form located at Appendix 2 is completed for the pupil and medication.

## Administration of Medicines

There are 3 levels of administration of medicines in schools:

- A. The child self-administers their own medicine of which the school/ service is aware
- B. The child self-administers the medication under supervision
- C. A named and trained consenting staff member administers the medicine

(Further details on each of the above can be found on pages 37-41 of the overarching guidance document “The Administration of Medicines and Associated Complex Health Procedures for Children Advice & Guidance for Children’s Services in Derbyshire”)

Administering medications is a purely voluntary activity (unless specified as part of a staff member’s job description). Therefore, participation in the administration of medication is on a voluntary basis and staff cannot be compelled to administer medicines unless they have accepted job descriptions that include duties in relation to the administration of medicines. The school will encourage staff to be involved where necessary in administering medication to ensure pupils access to education is not disrupted however:

- Individual decisions on involvement will be respected.
- Punitive action will not be taken against those who choose not to consent

In this school medicines (except rescue medication – see note below) will only be administered by the following staff:

- Ms Rich
- Mr Marsh
- Mrs Ward
- Miss Mathison
- Mrs Wigley
- Mrs Ford
- Miss Sidwell
- Miss Moorley
- Miss Tebb

*Rescue medication will only be administered by trained, competent staff in line with the pupil’s care plan.*

All staff who administer medications will receive sufficient information, instruction and where necessary training to undertake this task. Training from a health professional will always be required for invasive procedures requiring a specialised technique. Examples include (but are not limited to) Diabetes, epilepsy, gastronomy and rectal medication.

For most routine administration of medicines, knowledge of this policy and the guidance contained within it will be sufficient as staff will not be expected to do more than a parent/carer who gives medication to a child.

Where a child has complex health needs and an individual treatment plan and requires specific or rescue medication the staff administering the medication will have detailed knowledge of the individual treatment plan and will have received suitable training from health professionals to undertake the administration of the medicine. This training will be refreshed annually or as required should there be any significant changes to the medicine or administration procedure.

For all administration of medicines the following procedures will be adopted:

1. Wherever possible, two staff will be involved in the process to ensure that the correct dose of the correct medicine is given to the correct child and once the medicine has been administered both will sign the Medicines Administration Record (MAR) sheet (NB for controlled drugs there **must** be 2 people in attendance)
2. Before the medicine is given each time, staff will ensure they have checked the following

Right Person	Is this the right person for this medicine?
Right Medicine	Is it the correct medicine? Do the label instructions match up with the instructions on the written consent? Is the name the same?
Right Dose	Dose the label state the same as the instructions? Remember to check not just the amount eg 5ml or 10ml but also the correct concentration eg 125mg/5ml
Right Time	Are you sure it is 12 midday that this medicine should be given? Where can you check?
Right Route	Are you sure that the way you are about to give the child this medication is the right way? You are not going to put ear drops in their eye?
Right Date	Ensure the medication has not expired. Always check on the label for instructions that may relate to this eg Do not use after 7 days. Always check the documentation that is has not already been given

3. Medication will only be given to 1 pupil at a time and the MAR sheet will be completed before any medication is given to the next pupil.
4. Only the medication for that pupil will be taken out of the storage and this will be returned to storage before starting the process for the next pupil

IF THERE IS ANY DOUBT WHETHER THE MEDICATION SHOULD BE GIVEN FOR ANY REASON THEN THE MEDICATION WILL NOT BE GIVEN. FURTHER ADVICE SHOULD THEN BE SOUGHT FROM HEALTH PROFESSIONALS AND /OR PARENTS AND THIS SHOULD BE RECORDED AND REPORTED TO THEIR LINE MANAGER.

5. If a pupil refuses to take their medication or it is suspected that they have not taken a full dose staff will record this on the MAR sheet and immediately seek advice from health professionals and/or parents/carers. This should also be reported to their line manager. They should not attempt to give another dose or try and force the pupils to take another dose.

### **Being notified that a child has a medical condition**

When the school is notified that a pupil has a medical condition, the process outlined below will be followed to decide whether the pupil requires an IHP. **See Appendix 3.**

The school will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for pupils who are new to our school.

## **Individual healthcare plans (IHPs)**

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions. This has been delegated to Stephanie Rich (Office Manager) to co-ordinate and liaise with parents and carers.

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

- What needs to be done
- When
- By whom

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is no consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with the school, parents and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

IHPs will be linked to, or become part of, any education, health and care (EHC) plan. If a pupil has SEN but does not have an EHC plan, the SEN will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The governing board and the headteacher and office manager will consider the following when deciding what information to record on IHPs:

- The medical condition, its triggers, signs, symptoms and treatments
- The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
- Specific support for the pupil's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
- Who in the school needs to be aware of the pupil's condition and the support required
- Arrangements for written permission from parents and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
- Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition
- What to do in an emergency, including who to contact, and contingency arrangements

## **Managing medicines.**

Prescription and non-prescription medicines will only be administered at school:

- When it would be detrimental to the pupil's health or school attendance not to do so **and**
- Where we have parents' written consent

**The only exception to this is where the medicine has been prescribed to the pupil without the knowledge of the parents.**

Pupils under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

Anyone giving a pupil any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents will always be informed.

The school will only accept prescribed medicines that are:

- In-date
- Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and not locked away. In usual cases, medicines will be stored in the green medicines box in each classroom alongside a child's Individual Healthcare Plan. Medicines will be returned to parents to arrange for safe disposal when no longer required.

## **Controlled drugs**

[Controlled drugs](#) are prescription medicines that are controlled under the [Misuse of Drugs Regulations 2001](#) and subsequent amendments, such as morphine or methadone.

A pupil who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another pupil to use. All other controlled drugs are kept in a secure cupboard in the school office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

## **Pupils managing their own needs**

Pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents and it will be reflected in their IHPs.

Pupils will be allowed to carry their own medicines and relevant devices wherever possible. Staff will not force a pupil to take a medicine or carry out a necessary procedure if they refuse, but will follow the procedure agreed in the IHP and inform parents so that an alternative option can be considered, if necessary.

## **Unacceptable practice**

School staff should use their discretion and judge each case individually with reference to the pupil's IHP, but it is generally not acceptable to:

- Prevent pupils from easily accessing their inhalers and medication, and administering their medication when and where necessary
- Assume that every pupil with the same condition requires the same treatment
- Ignore the views of the pupil or their parents
- Ignore medical evidence or opinion (although this may be challenged)
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs
- If the pupil becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable
- Penalise pupils for their attendance record if their absences are related to their medical condition, e.g. hospital appointments
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- Require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their pupil, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs
- Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of school life, including school trips, e.g. by requiring parents to accompany their child
- Administer, or ask pupils to administer, medicine in school toilets

### **Emergency procedures**

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent arrives, or accompany the pupil to hospital by ambulance. Wherever possible, the head teacher would be the person to attend with the child until parents/ carers arrive,

### **Training**

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the head teacher. Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils
- Fulfil the requirements in the IHPs

- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative and emergency measures so they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

### **Record keeping**

The governing board will ensure that written records are kept of all medicine administered to pupils for as long as these pupils are at the school. Parents will be informed if their pupil has been unwell at school.

IHPs are kept in a readily accessible place which all staff are aware of. At Scarcliffe, they are kept in the green medicine box in each classroom.

### **Liability and indemnity**

The governing board will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

The details of the school's insurance policy are:

- We will ensure that we are a member of the Department for Education's risk protection arrangement (RPA).

## Appendix 1

### Parental Consent for School to Administer Medicine

The School will not give your child medicine unless you complete and sign this form, and has a policy that staff can administer medicine, and staff consent to do this.

**Note: Medicines must be in the original container as dispensed by the pharmacy**

Name of School

Date

Childs name

Date of birth

Group/Class/Form

Medical condition or illness

#### **Medicine**

Name/type of medicine/strength  
*(as described on the container)*

Date dispensed

Expiry date

Agreed review date to be initiated by  
 (name of member of staff) (LONG TERM  
 MEDICATION ONLY)

Dosage and method

Timing – when to be given

Special precautions

Any other instructions

Number of tablets/quantity to be given to  
 School/Setting

Are there any side effects that the  
 School/Setting needs to know about?

Self administration

Procedures to take in an emergency

#### **Contact Details – First Contact**
